

Metofil International is a metal stamping and wire forming manufacturer specializing in the production of metal building materials and a wide variety of metal and wire products. Originating in 1981, Metofil International and its team of highly trained staff have succeeded in providing quality metal products at significantly competitive pricing.

Equipped with a wide variety of caliber presses, benders and four-slide machines and benefiting from in house specialists, Metofil International takes pride in providing its clientele fast, reliable and quality assured service.

Our company takes great pride in specializing in metal reinforcement material and infrastructure products for the building industry. These products include (but are not limited to):

- Block reinforcing - Masonry anchors - Masonry ties - Construction products
- Manufacturer of dowel baskets and load transfer devices

Projects realized:

- Highway 132 Longueuil (2010) - Pierre Elliott Trudeau Airport (2011) - Mirabel Airport (2011)
- Vaudreuil Tool Booth (2012) - Target Warehouse Cornwall (2012)

In addition, our company offers a wide variety of service that may be of use to your purchasing group. Based on a versatile manufacturing system, Metofil International excels and specializes in the wire-forming and metal stamping industries. Virtually any metal/wire item can be formed by our experienced personnel. We specialize in manufacturing custom parts such as (but are not limited to):

- Gardening accessories - Custom made displays - Display accessories

Metofil International can also provide welding, heat treating and electro plating services through its affiliate companies. We combine 20 years of experience with our various contacts in the field to provide our customers with highly competitive prices with an unmatched service.
