Rust May Conquer Others, But Steel Packed With

acorpac
Remain Untouched

www.acorpac.com

Who is Acorpack ?

Acorpack Ambalaj San. Tic. A.Ş. has been supplying to steel market with quality products since we were established in 2008. In 2016 we expanded our capacity with new products and services to companies outside of the steel market.

Mission & Vision

Mission

We're on a mission to make waves in the packaging industry! Our aim is as straightforward as it is ambitious: to craft innovative solutions that genuinely add value for everyone involved – our clients, partners, and our dedicated team.

Vision

Picture us as the dreamers and doers in the world of packaging. Our goal is to be globally recognized as the most creative and leading company in our field.

Why should you choose Acorpack?

● We can meet your requirements

We have the capacity to produce 600 Tons/month of packaging materials. We can produce widths from 200 mm up to 3000 mm. We are also able to print any color according to your preference, and up to 2 colors (colors for the American market and colours for British, your choice) of your company's logo. Upon request, we can apply VCI (volatile-corrosion-inhibitor) to all our products.

● Safe & Economical

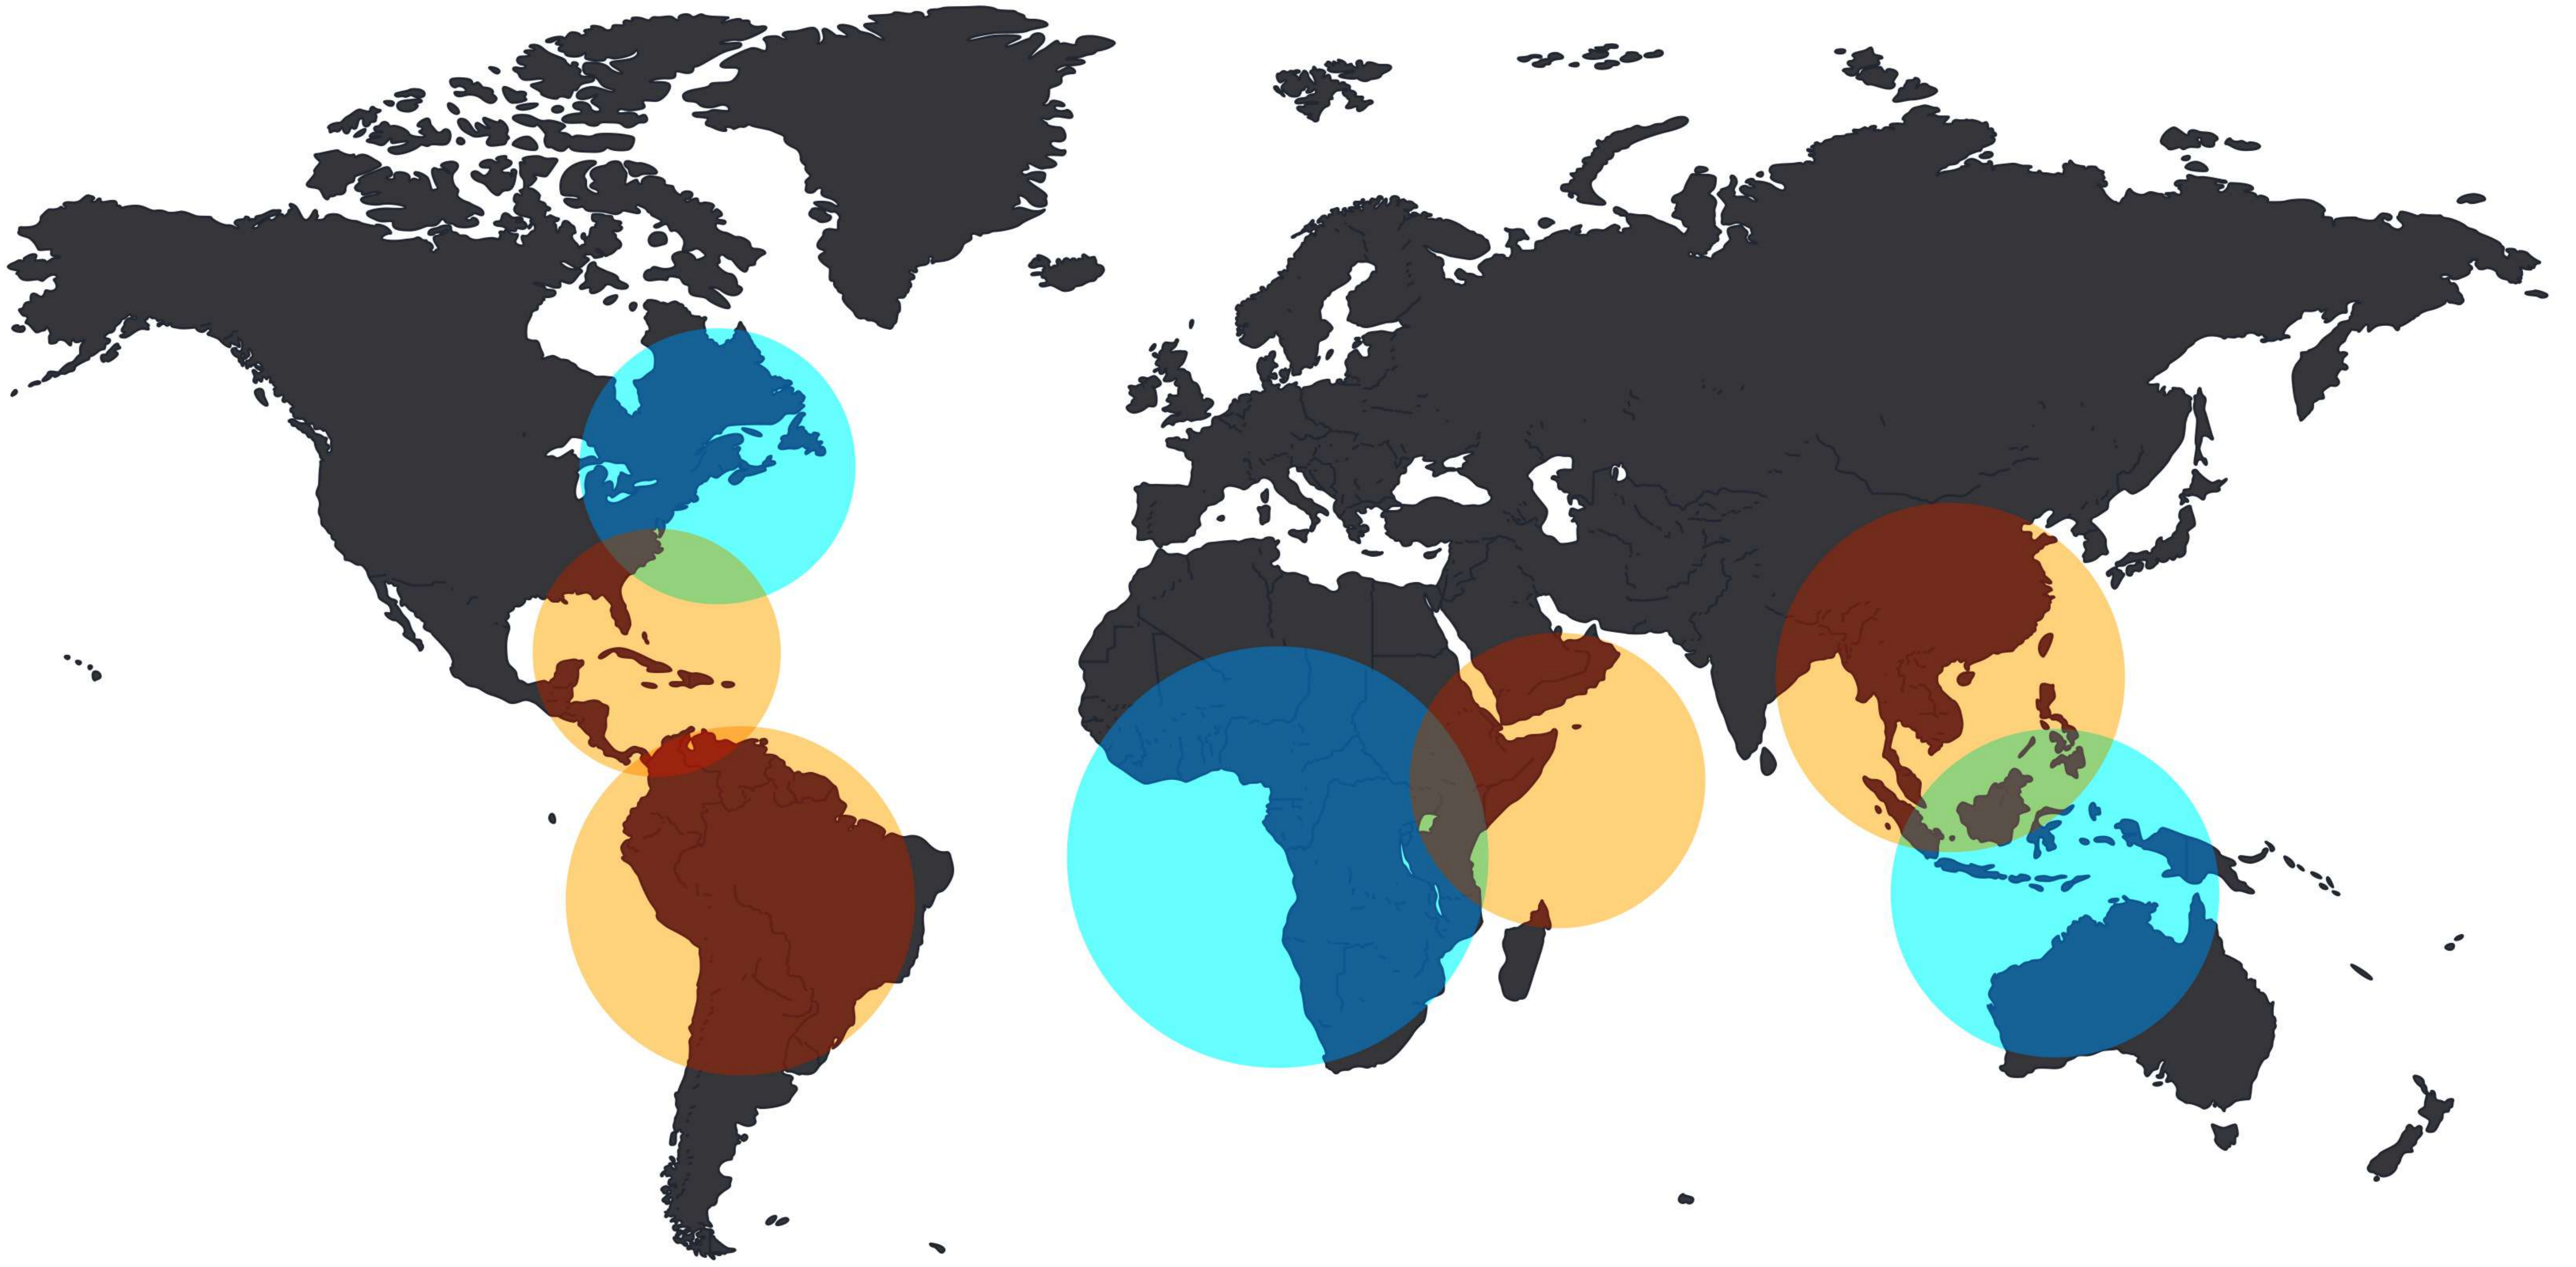

Our product is the preferred material for safe and economical packaging. Through our years of experience, we have developed the know-how to make our packaging materials lighter, stronger and more flexible.

● Extra Strength

Our customers really appreciate the extra strength built into our products. They love our quality. While some products on the market can be torn by hand, or by rough handling, our products maintain their integrity even under the most severe conditions.

● Effective

This product is used to protect against damage from water, moisture, oil, dirt and scratches. Acorpack's lamination layers are highly water resistant, thereby providing an excellent protective barrier. Kraft paper provides an absorbent layer against moisture within the air. The PP woven fabric gives the strength to hold your products together and will resist tearing even when exposed to sharp edges. We understand how important it is to have reinforced woven material when dealing with such products.

Stronger Together

Acorpack is one of the biggest supplier in Europe which supply world biggest steel companies in 5 continents

Quality Policy

In order to provide our customers with the best products available, we have implemented a Total Quality Management (TQM) process. We know that path to long-term success is through customer satisfaction. We never stop improving our quality through processes, procedures, production, products, and customer service after the sale. We adopt following through our production and services:

Aim to increase the participation and satisfaction of employees

Approach to long-term success is through customer satisfaction

Integrate High-performance work systems with continuous improvement

Increase the total efficiency in production activities

All products are produced according to related regulations and ISO 9001:2008 Quality Management System.

Our Core Values

Solution-Oriented

We're focused on solving problems. Our culture revolves around seeking the most effective outcomes, whatever it takes.

Family Culture

We nurture a 'big family' atmosphere, strengthening a sense of ownership and collective responsibility.

Teamwork

Success for us is all about teamwork. Together, we achieve great things.

Fast and Flawless Execution

We're committed to delivering rapid and flawless solutions.

Innovative in Packaging

By addressing the unresolved challenges in the packaging sector, we're redefining industry standards.

Certificates

The logo for Acorpack, featuring the word "acorpacK" in a bold, orange, lowercase sans-serif font. A registered trademark symbol (®) is positioned to the upper right of the letter "K". Below the logo is a solid orange horizontal line.
